

```
unordered_map< INTELLI  
::TensorPtr, uint8_t >
```

```
int
```

visited_

visno

```
CANDY::VisitedTable
```

The diagram illustrates the relationship between a C++ unordered_map, an integer, and a CANDY::VisitedTable object. At the bottom is a grey box labeled 'CANDY::VisitedTable'. Two dashed purple arrows originate from this box: one labeled 'visited_' points to the 'unordered_map' box, and another labeled 'visno' points to the 'int' box.
